

Reduce Your Insurance Costs with Customized Loss Control Programs Based On Our Analysis of Your Business

Reducing insurance related costs requires controlling risk through sound loss control and risk management techniques. Capacity Coverage conducts a Loss Control Evaluation of your operation to identify the strengths and weaknesses of your loss control programs. Based on our analysis, we provide customized programs to enhance your current loss control efforts.

From strategic planning to implementation, your safety initiatives help you to:

- Reduce employee injuries
- Reduce insurance costs
- Promote continuous improvement in safety
- Improve OSHA compliance

Capacity provides strategic planning, program development, and execution by:

- Assessing and engineering solutions for special problem issues identified during on-site consultative visits
- Identifying conditions that could result in violations of statutory requirements of federal, state and local governmental agencies.
- Monitoring operations, exposures to loss, current loss control programs, past accident/loss experience and identified problems
- Ongoing monitoring of Insurance Carrier reporting and consulting activity
- Reviewing loss control policies pertaining to: safety and health, fleet control, site hazards, ergonomics, and more
- Identifying trends and special loss causes via specialized loss cause analysis
- Developing dedicated off-line databases for in house accident and incident record keeping and analysis
- Assisting in procurement and quality control of training material and outside consultants if needed
- Providing ongoing online safety education programs

We provide the broadest range of loss control support, assistance, and resources
